Project Ideas maybe?
- Rent a puppy website
- Grab and Go ordering website ex. (site my group made in a different class http://cubuffburgers.herokuapp.com/)
- Hiking Buddy service/Ski Buddy service?
-

Team name ideas?
- PuppyProviders, Rent-a-Pup, Puppies-R-Us
-

Team: Callie Jones, Elijah Staple, Elias Ortiz, Calvin Stoehr
Rent-a-Pup!

Title: Puppy matching website

Description: A puppy matching website that clients can login in to, request(order) time with a puppy or more, and leave feedback regarding the time that they spend with each puppy. On the admin side, keep track of which puppy is going where, when, and for how long.

Actors: admin, customers

Functionality:
- Customers can sign up
- Customers can login
- Admin can login
- Admin can add products
- Admin can view a customer's order
- Admin can ban customers
- Customers can checkout/pay

Stretch Functionality (OPTIONAL):
- World Peace
- Enable clients to purchase puppies that they have already tried out.
- Have listed with each pup the diet, exercise, and what kind of activities they like. (ie. This older dog prefers shorter walks, and sitting on the couch watching tv with you OR this younger dog loves walking often and playing at the dog park. This could lead to better matches or something.)
